Haven road in New Haven Thursday there is little change in the situation. The road has managed to operate its freight trains thus far but it is expected that the situation will begin to assume a serious aspect by Saturday.

The discontinuance of the passenger trains is effected to permit the use of passenger train engines on freights. By adopting this course, the road was able to run all its freights, especially those with perishible freight Friday, but how long this can be continued is problematical. Already, 'j is stated, freights are beginning to be held up some at Midway and are' congesting the west yard.

It is expected that the road can maintain its freight service for a short time but if the strike continues for several days, the system would soon be crippled for lack of engines which need overhauling and repairs every five or six days.

Has Confidence in People. Has Confidence in People.

We cannot hastily and over night revolutionize all the processes of our economic life. We shall not attempt to do so. These are days of deep excitement and of extravagant speech; but with us these are things of the surface. Everyone who is in real touch with the silent masses of our great people knows that the old strong fibre UNDER BULGARIAN RULE people knows that the old strong fibre and steady self-control are still there, following communication the following communication that would throw their affairs into confusion. We Have Just Awakened. And I entertain another confident ope. I have spoken today chiefly of hope. I have spoken today chiefly of measures of imperative regulation and legal compulsion, of prosecutions and the shatp correction of selfish processes; and these no doubt are necessary. But there are other forces that we may count on besides those resident in the department of justice. We have just fully awakened to what has been going on and to the influences many of them very selfish and sinister, that have been producing high prices and have been producing high prices and impesing an intolerable burden on the mass of our people. To have brought it all into the open will accomplish the greater part of the result we seek.
